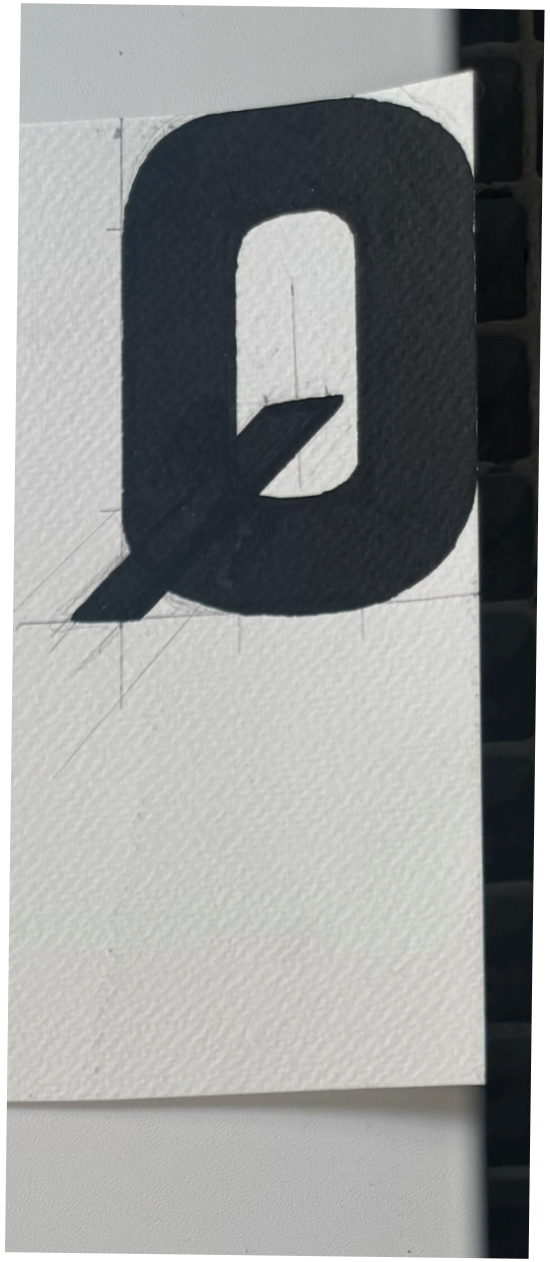
LETTERFORM

Q

From a hand-drawn sketch to a digital letterform

Karolína Princová



Hand-drawn starting point

First of all I drew the uppercase Q by hand.

The heavy geometric shape became the basis for the digital version.

Original material: marker and paper

Scan and digital correction

01

Scanned drawing

02

Illustrator correction

I mirrored the form digitally to correct its direction, then refined the outline while keeping the original weight.

Testing three cuts

Regular

Balanced proportions closest to the first drawing.

Bold

More weight and a denser, stronger appearance.

Condensed

Reduced width and a more vertical rhythm.

These are typeface cuts: Regular, Bold and Condensed.

Final decision

REGULAR

The Regular cut kept the character of the original drawing.

The Bold version felt too heavy, while the Condensed version changed the proportions too much. I therefore returned to the first digital version and kept the corrected direction.

Final letterform: Q, Regular cut
